

The Florida Charter School Alliance is the only non-profit, member-driven association that defends, promotes, supports, and collaborates with Florida public charter schools to influence legislative policy and environments to ensure our members have the freedom to develop, maintain, and grow their high-quality public charter schools.

The Alliance has been a driving force behind major legislative victories that have advanced equity and opportunity for all public charter schools and the students they serve. Through relentless advocacy, we've secured shared access to tax dollars, fair and equitable student funding, and increased capital outlay support — all without compromising charter school autonomy or accountability.
